

Post – Op Bariatric Patient follow up made easy with our unique mHealth Solution!

Now Track and Monitor your Patients’ weight loss journey anytime, anywhere!

“Mutelcor Bariatric is a pioneering turnkey solution that has all the essential variables to radically transform the conventional patient follow up model. Its live reporting analytics tool (IPDA) converts large patient data into informative reports within fraction of seconds for doctor to ascertain health trends and improvements in patient outcomes.” – Dr. Veronique Dinand, Chief Scientific Officer, New Delhi

Launching for very first time in India, Mutelcor Bariatric mHealth is a purpose built system to improve follow up after the patient is discharged post his/her bariatric surgery.

Adapting to a new life after weight loss surgery with changed diet, supplement needs, medication and dealing with post op complications can be little overwhelming for the patients to handle.

What if the same patients are empowered with a mobile app where they can:

- ✓ Feed Vitamin D, Iron, Calcium, B12, CBC and other vitals
- ✓ Log daily dietary intake and view auto analysis of protein, fats, carbs consumed
- ✓ Track daily activities and view auto analysis of calories burnt
- ✓ Set am/pm daily or weekly medication reminders,
- ✓ Upload/Send Lab and x-ray reports to the doctor,
- ✓ Report anomalies and symptoms to doctor in real time,
- ✓ Chat or Video consult with the doctor remotely
- ✓ Book appointments for a visit to the clinic
- ✓ Receive periodic e-prescription and nutrition plans

... in comfort of their homes?
